

Open Data for transparent STI monitoring & assessment

Natalia Manola, OpenAIRE CEO

STI: the new policy environment

Interconnectedness

A chain of models, a complex system with multiple actors and multiple pathways. **Participatory policy** style

Digitalization

Reshapes innovation through data driven processes and is speeding innovation cycles , from design to product to user feedback

Policy Intelligence

Streamlines a big data, AI-assisted policy modeling approach to augment human judgment for evidence-informed policy making

A wide range of actors involved

Different interests, different intervention points

Tracking & assessment of STI

- **Evidence-based**
- **Automated**
- **Sustainable** – tracking long-term & repeatedly, outputs and impact of innovations
- **Comprehensive** – 360° view across multiple facets of STI activities
- **Granular** – in-depth analysis to identify pathways and gain understanding
- **Trustworthy** – to guide decision making and buy in from the public

Open data, Big data, AI

Where does **open data** come into play?

Open data as a means of

- Identifying research outcomes easily – **no barriers** to evidence
- Embedding **transparency** in assessment – bringing trust into science
- Allowing more players to enter the game – more opportunities for **innovation**

Open science practices

- Sharing results at early stages – **responsiveness**
- Involvement of citizens – **participatory**
- Need for advanced **digital skills** – contributing to a European digital workforce

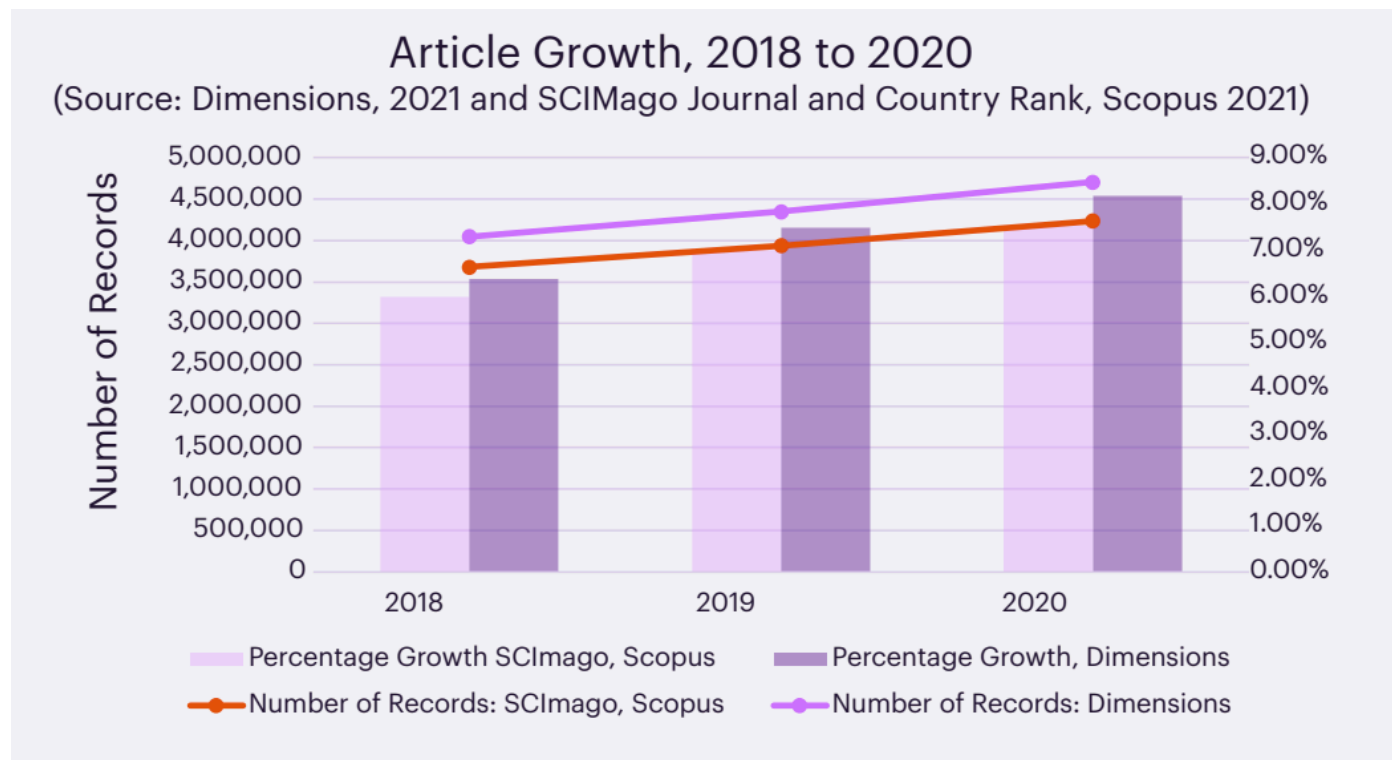

Big data

Scientific output is getting bigger in volumes

AI

Tools to clean, enrich and understand

Source: STM 2021 Global Brief – Economics & Market Size

For H2020 – 84% is OA

A smaller portion fully machine reachable or reusable (FAIR)

OpenAIRE in IntelComp

Open Science meets AI

WHO IS OPENAIRE

A European infrastructure on open scholarly communication

Mission: Shift scholarly communication towards openness and transparency and facilitate innovative ways to communicate and monitor research.

Non-profit organization

- Established Oct 2018
- Headquarter Greece, virtual office
- 47 members
- From 34 countries

IRELAND
The Provost, Fellows, Foundation Scholars and the other Members of the Board, of the College of the Holy and Undivided Trinity of Queen Elizabeth in Dublin (TCD)

IRELAND
Landspítali University Hospital
University of Iceland
Library of Iceland

NETHERLANDS
Data Archiving and Networked Services (DANS)

BELGIUM
Leuven University

LUXEMBOURG
University of Luxembourg

FRANCE

Open scholarly communication data

- A big, global **data space** for scientific results
- Gathers publications, linked to data and software, people, organisations, processes, facilities
- All **linked** together
- Used for **discovery**, tracking and **monitoring** of open science
- A core resource in the **European Open Science Cloud**

A global CRIS+

- 120 Mi publications
- 12 mi data items
- 220 K software items
- 7 mi research products
- 20+ funders with 3 mi projects
- Linked to authoritative registries
- ...

Data collected augmented by AI

OpenAIRE: Fulfilling research community needs

- Classifications (Frascati, SDGs, NACE, domain specific,...)
- Links and correlations
- Scientific trends
- Groups, clusters, collaborations
- Innovations
- Technological readiness
- Insights
- ...

• IntelComp: Fulfilling the goals of STI policy formulation and assessment

- A wider data space: integrating and linking to non-academic data sources
- Open to communities and public

 **intelcomp**

A journey that has just begun
