

Sustainable Blue Growth under Climate Change Living Lab

Prof. Phoebe Koundouri (ATHENA RC)

15.06.2021

INTELCOMP WP1 Consultation Workshop

Blue Growth Research-Innovation-Policy Interface for a Sustainable and Resilient Recovery

[Prof. Phoebe Koundouri – www.phoebekoundouri.org](http://www.phoebekoundouri.org) – pkoundouri@aueb.gr

Professor School of Economics, Athens University of Economics and Business
Fellow, World Academy of Art and Science

President-Elect, European Association of Environmental and Resource Economists

-
- Director, Cluster on Sustainability Transition
 - Director, Sustainable Development Unit and EIT Climate KIC Hub Greece, ATHENA RC
 - Co-Chair, UN Sustainable Development Solutions Network (SDSN) Greece and EUROPE
 - Chair Scientific Advisory Board, European Forest Institute
 - Chair Scientific Advisory Board, International Center for Research for the Economy and the Environment, ICRE8
 - President of Climate Change Task Force, Green Cross International (GCI)
 - Commissioner, Lancet Commission for COVID 19 Recovery
 - Greek National Committee on Climate Change, Greek National Committee on 10-Development Plan

2050 long-term strategy

*The EU aims to be **climate-neutral by 2050** – an economy with net-zero greenhouse gas emissions. This objective is at the heart of the European Green Deal and in line with the EU's commitment to global climate action under the Paris Agreement.*

The Policy Framework

2015

193 Countries

Science, technology and innovation in EU

EU provides funding to:

- strengthen the EU's position in science
- strengthen industrial innovation, including investment in key technologies, greater access to capital and support for small businesses
- address major social concerns, such as climate change, sustainable transport and renewable energy
- ensure technological breakthroughs are developed into viable products with real commercial potential – by building partnerships with industry and governments
- step up international cooperation on research & innovation

Investing in research and innovation is investing in Europe's future.

UN SDSN Blue Growth Initiative: Call for Collaboration

A Competitive Intelligence Cloud/High Performance Computing Platform for AI-Based Science Technology & Innovation Policy Making

New and innovative AI services to public administrators and policy makers across Europe for a co-creation ecosystem that allows for data- and intelligent-driven policy design, implementation and making in the field of STI.

SDSN Networks

Trends

Protecting Europe's Seas and Oceans

The Marine Strategy Framework Directive

European Blue Economy
Indispensable to achieve EGD
ambitions. Many solutions
(renewable energy, plastic-free
packaging, low-impact food) will
come from the blue economy.

Blue sectors will have to reduce
their own environmental and
climate impact significantly to
contribute to the overall targets.

Several EU policies are already in
place or being created, and will
come together in the new
approach for a sustainable blue
economy in the EU, expected in
May 2021.

Methodology - Activities

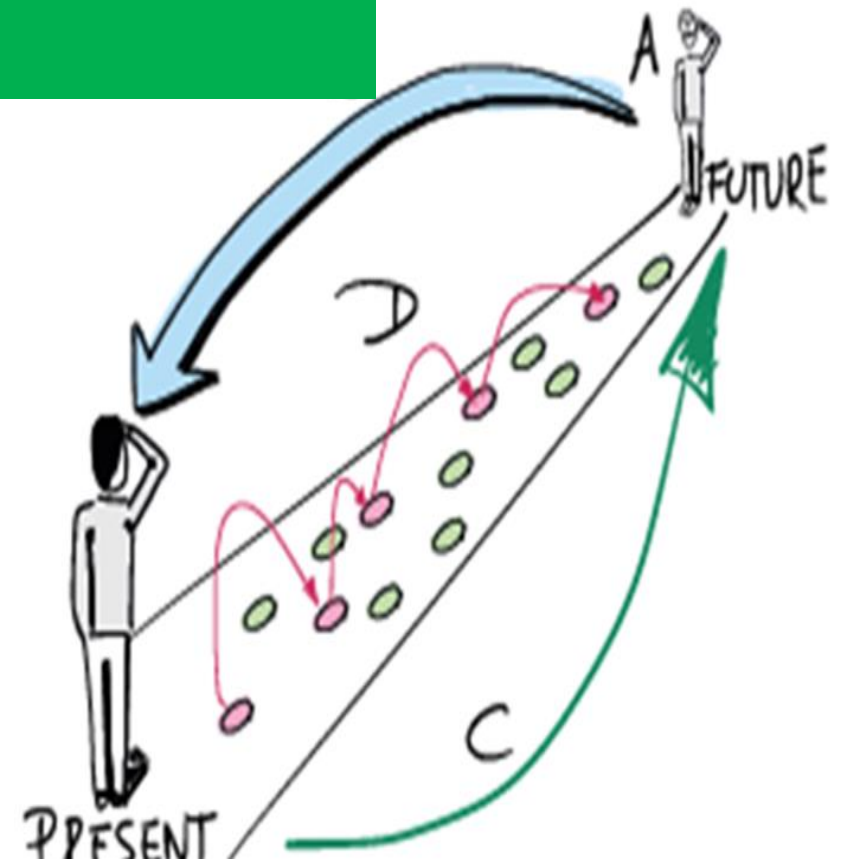

- Use IntelComp Viewer to **explore and understand** the scientific production and trends related to blue economy and climate: what are the trends in R&D and what are the national competence on specific subtopics, that are the most efficient teams and how do they collaborate on the EU and global level
- Develop and customize AI modules to **classify R&D** according to climate related SDGs.
- Develop, customize or adapt AI modules to **identify innovations** and **policy recommendations** from projects (reports and publications) and teams and transform them to indicators for specific needs.
- Develop, customize or adapt AI modules to **extract and interlink information** for the understanding and mapping of interrelated policies, laws and strategies implemented in Greece.
- Consider interfaces and analysis tools to gauge **collaboration / co-development** via social/traditional media.

Five vital elements

- **Climate change** and its **implications on Blue Growth**
- **Holistic mapping and understanding of the laws, policies and strategies at International, European and National level**
- **Innovations and new technologies** to enhance mitigation and adaptation to climate change
- **Natural Capital Accounting and Valuation of Ecosystem Services**
- **Connections with different innovation ecosystems and networks** in order to find synergies.

Sustainable Blue Growth and Climate Change Living Labs

Systems Innovation can be understood as a combination of systems thinking and the process of innovation so as to enable transformative change within complex systems

Living Labs

Stakeholder mobilization through **Systems Innovation approach**

Defining stakeholders at EU level, behaviours, relationships, interlinkages

Four sets of Living Labs

- 1) Interactive Model Trainer set up and validation
 - The objective is to work with the engaged administrative units in a co-creation iterative process to obtain feedback
- 2) IntelComp Tools for Public Administrations
 - Define the context, needs, analysis, co-creation framework
 - Co-create a vision and specific goals
- 3) IntelComp Tools for Citizens
 - Define challenges and revise expected outcomes of the platform
- 4) IntelComp tools for Academia and Industry
 - Policy development

Data - Living Labs

user-centered, iterative, open-innovation ecosystems, often operating in a territorial context, integrating concurrent research and innovation processes within a public-private-people partnership.

Approach

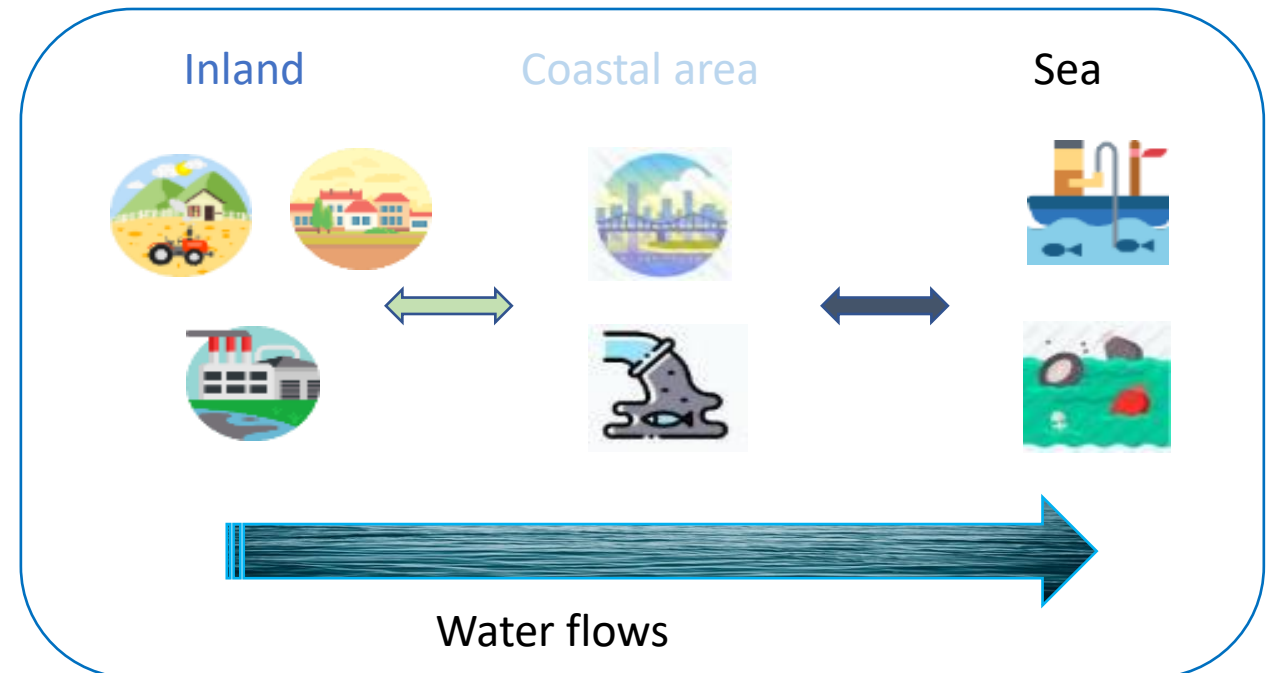

River Basin/Coast/Sea Ecosystem

COASTAL
Collaborative Land-Sea
Integration Platform

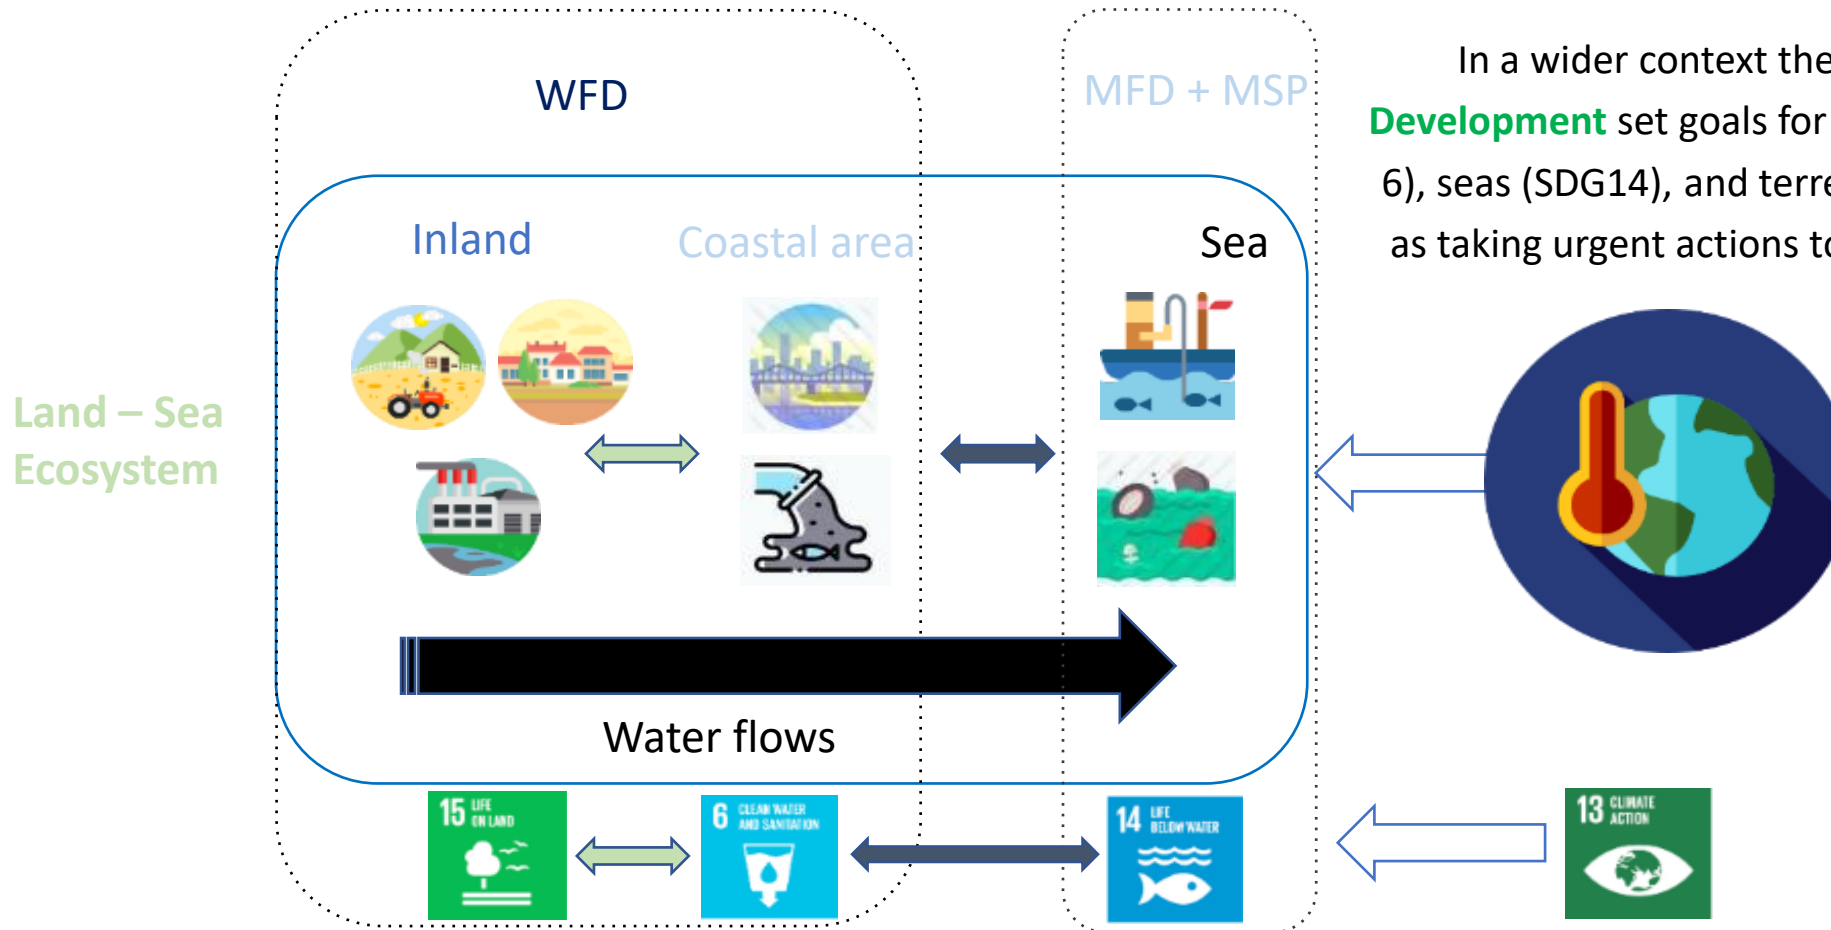

- At a river basin scale, land-based ecosystems and coastal & sea ecosystems are directly linked through water flows. In the same way, land-based activities (agriculture, forestry, industries & urbanization) are directly impacting land ecosystems and coastal & sea ecosystems.
- Coastal & seas regions concentrate populations and economic activities but also environmental stresses & pollutions.
- On the other hand, rural hinterlands face depopulation and economic recession, while still environmentally impacting coastal regions.

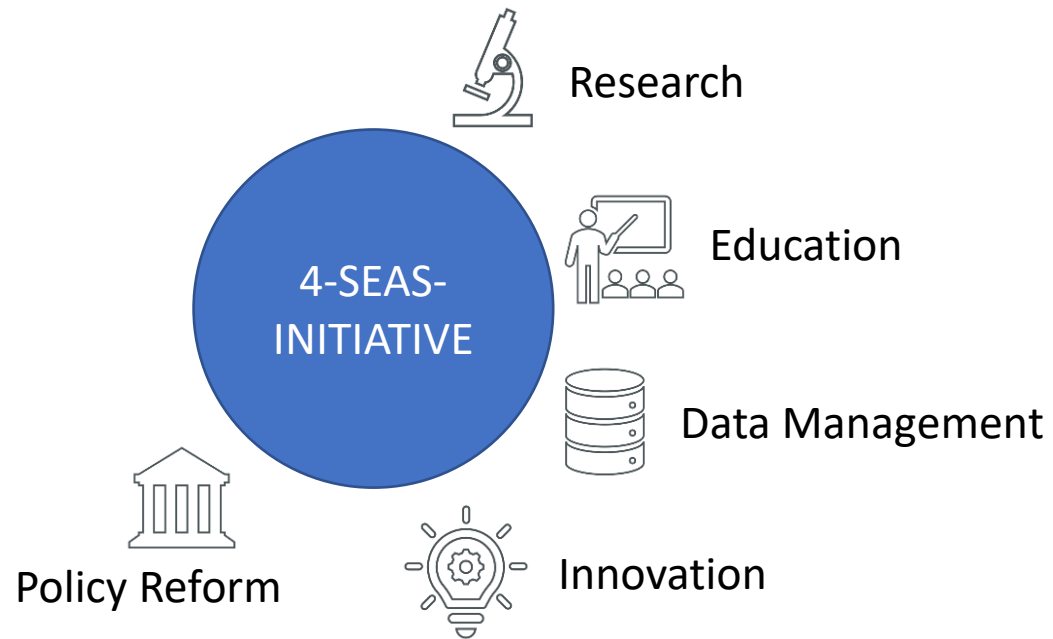

Approach

The **EU Water Framework Directive** seeks to reach the Good Environmental Status of rivers while the **EU Marine Strategy Framework Directive** targets the Good Environmental Status of EU marine waters but the two legislations lack interconnections.

In a wider context the **2030 Agenda for Sustainable Development** set goals for sustainable use of freshwater (SDG 6), seas (SDG14), and terrestrial ecosystems (SDG 15) as well as taking urgent actions to combat climate change (SDG13).

SBGI-OBJECTIVES

The BLUE GROWTH INITIATIVE will focus on 5 Objectives

- Research
- Education
- Data Management
- Innovation
- Policy Reform

Cluster for Sustainability Transition: Transforming Research and Innovation into Sustainability Action

President Elect of
European Association of
Environmental and
Resource Economics
- Dr. Ismail Serageldin,
Founding Director
Bibliotheca Alexandria, ex
Vice President World
Bank
- Dr. Min Zhu, Deputy
Managing Director IMF

Task Force: Job-Based Green Recovery

Economic recovery plans should support the transition towards sustainable and inclusive societies based on the SDGs and the Paris Climate Agreement.

Public investment should be oriented towards sustainable industries and the digital economy and should spur complementary private investments.

A major goal of the recovery should be an unprecedented commitment to reskilling and upskilling people, including the skills to prepare workers for the digital economy.

The EU Green Deal, long-term budget (2021–27), and new recovery fund marks an exemplary framework for long-term recovery, including mid-century goals on climate safety, energy transition, and circular economy, with a comprehensive €1.8 trillion budget.

EGD can serve as an exemplar for other regions. In general, recoveries should be smart (based on digital technologies), inclusive (targeting lower-income households), and sustainable (featuring investments in clean energy and reduced pollution).
